

CRÉATION BAUMANN | HEALTH CARE

CALMING
FRESHNESS

General hospital, Hameln, Germany

Production year: 2006

Architect
Nickl and Partner, Munich

Initial situation
It is in the modern, newly constructed wing of the general hospital that the windows were to be designed and constructed in a sturdy and robust manner, to meet the high requirements towards aesthetics and functionality.

Solution
A pale blue dimmer fabric lends the patients' rooms freshness. The same shade was chosen for our Shadow product in order to provide the individual workplaces with glare protection. The examination and staff rooms were equipped with our Pado vertical blinds that filter the light and have a calming effect on the patients thanks to their discreet grey shades.

Product
Dimmer, Pado, Shadow
