

CRÉATION BAUMANN | OFFICE

1,000 M DIGITAL PRINT

Nordea Bank, Stockholm, Sweden

Architekt
Ahlén Inredningsarkitekter, Stockholm

Production year: 2005

Initial situation

The head count in an existing office building had doubled. Thanks to the use of special partitions, logical aisles could be created throughout the rooms. The task consisted in integrating these partitions into the existing architecture in order to create a pleasant work climate.

Solution

In co-ordination with the architect, the Primavera design of the partitions was adapted to fit perfectly with the existing curtains. The fabrics are interchangeable - after all, it is certain next spring will come.

Product

1,000 Primavera design panels on CS Satin, processed specifically to prevent soiling.
