

CRÉATION BAUMANN | OFFICE

Furniture house Pesch GmbH & Co KG,
Cologne, Germany

Architects:
Eva-Maria Mucharowski, Cologne

Initial situation:
The outside display window of Pesch furniture house in Cologne is directed towards the pedestrian zone and was to be redesigned. The display window exists of two glass elements that meet each other at a right angle.

Solution:
Both visible sides of the display window were equipped with Gecko.
On eye level - sometimes somewhat higher, sometimes somewhat lower - large circles were cut out by laser, allowing for a view of the product presentation in the shop window. This ensures a highly exciting glass facade that makes passer-bys curious to see more, to stop in front of the display window and take a look inside.

Products:
Gecko Crypta

PANORAMIC
PEEPHOLES
