

Sparkasse, Bielefeld, Germany

Interior architect:  
Beate Weller, Frankfurt on the Main

Initial situation:  
A new design concept was to be worked out for the boardroom of Sparkasse Bielefeld. The conference rooms run towards the south and therefore require flexible glare protection. Given the fact that the conference rooms and the lounge area can be separated for events of different scale by means of mobile partition walls, every window required an individual and integral solution.

Solution:  
An absolute classic was chosen: The screen-like fabric of Shade provides a contemporary, high-tech look that fits into every modern environment. The white roller blinds are discreet and ensure pleasant lighting in every situation.

Product:  
Rollectro II and Shade II R
