

Conference Centre Brucknerhaus,  
Linz, Austria

Architect:  
Heikki Siren, Finland

Initial situation:  
It took five years to construct this conference centre that was inaugurated in 1974 and today belongs to the most important of its kind in Europe. In 2007, the seats were to be replaced; the colour concept and their acoustic properties were, however, to be maintained.

Solution:  
Création Baumann's Astra fulfils these requirements impeccably. In addition to this, we also developed and produced a special upholstery fabric in order to ensure a high quality solution and rapid delivery times.

Products:  
Astra and the special version
